HG hygienic mattress freshener

hygienic mattress freshener

- for regular freshening up and to remove problematic odours
- works on the basis of natural enzymes and microbes

- does not mask, but removes the source of the unpleasant odours and produces a fresh, hygienic result
- works after just 20 minutes

500 ml e

Mattresses can start to smell less fresh over time. HG "hygienic mattress freshener" has been developed for regular, convenient, hygienic and organic freshening up of a mattress, which prevents unpleasant odours caused by normal night-time perspiration and the mattress continues to stay fresh and smell fresh.

It is also extremely suitable to remove unpleasant odours, caused by heavy perspiration during flue, unwanted urine loss or vomit. This product works on the basis of natural enzymes and microbes, which means the odours are not masked but removed effectively and the mattress is hygienically fresh again.

Directions for use: Turn the nozzle on the front a quarter turn. Turn the nozzle a quarter-turn after use (OFF).

Regular freshening up

1. To prevent unpleasant odours and to ensure a permanently fresh mattress, we recommend using HG "hygienic mattress freshener" every time you change your bed linen.
2. After you have taken off the bed linen, spray the mattress lightly with the liquid.
3. When the mattress is dry, you can make the bed again.

Removing problematic odours

1. Remove the bed linen and remove the cause of the odour as much as possible by absorbing the liquid with a dry towel or tea towel.
2. Then, depending on the nature of the problem, spray a liberal amount of liquid on the entire mattress or just on the relevant part.
3. The unpleasant odour disappears between 20 minutes and a few hours, depending on the thickness and porosity of the mattress.
4. The unpleasant odour has disappeared completely when the mattress is dry and then the bed can be made again.

Attention: Transport and store the bottle upright. If the result is unsatisfactory, you did not use enough product or the product was not applied properly to the "odour source". In that case, repeat the treatment. If it is difficult for the product to reach the "odour source", it may be less effective. This product does not remove stains caused by perspiration or urine. Use HG "stain spray" or HG "stain spray extra strong" to remove those stains. Keep from frost. P101- If medical advice is needed, have product container or label at hand. P102- Keep out of reach of children.
