active oxygen

500 ml e

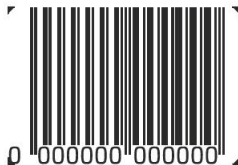

HG laundry pre-treat stain remover extra strong

- enhanced with active oxygen
- convenient foam spray
- for washing by hand and in the machine
- removes even the worst stains

HG laundry pre-treat stain remover extra strong is enhanced with active oxygen and therefore it is able to remove even the most persistent stains caused by red wine, tea, fruit juice, chocolate, gravy, spinach, grass, soil etc. This special formula in a convenient foam spray is suitable for nearly all types of fabric.

Directions for use:

1. Turn the nozzle on the front a quarter turn. If you have used the bottle before, remnants of the liquid may be left in the nozzle, causing it to work less well when you reuse the bottle. Before reusing the bottle, we recommend you rinse the nozzle with hot tap water by running the water through the air holes at the side of the foam pipe.
2. For coloured fabrics, test the colour-fastness first (see attention).
3. Spray an ample amount of the product onto the spots and stains until they are fully covered.
4. Massage the product into the spots and stains by rubbing the fabric against the fabric.
5. Leave the product to work for maximum 5 minutes, but prevent the product from drying out.
6. Wash the treated laundry immediately in the washing machine by using a main programme and add the main detergent.
7. If you wash by hand, add detergent to the water.
8. Turn the nozzle a quarter turn after use (OFF).
9. Wash your hands immediately after use or wear household gloves.

Attention: Transport and store the bottle upright. Do not use on wool, silk or other delicate fabrics. In case of doubt, use *HG laundry pre-treat stain remover*. Only use *HG laundry pre-treat stain remover extra strong* on colour-fast fabrics. In case of doubt, check each individual colour of the fabric for colour-fastness in an inconspicuous place (e.g. the inside of a hem). Do so by leaving the product to work for a few minutes, rinsing it well and then leaving it to dry. Avoid direct contact with metal elements (zips, buttons) or rust stains. Do not leave the product to work for longer than 5 minutes and do not let it dry out. Do not expose pre-treated laundry to direct sunlight. Do not mix with other products, such as bleaching agents, during the pre-treatment. Keep in a frost-free area.
