LAUNDRY ROOM

odour eliminator for clothes and fabrics

400 ml e 650 UK CA 3

HG odour eliminator for clothes and fabrics

- prevents unnecessary dry-cleaning costs
- safe for all fabrics
- natural cleaning process on the basis of plant extracts
- spray can on air pressure, so without propellant

Whether you are at a party, in a restaurant or at a barbeque, or even as a result of sweating, your clothing can often start to smell and on occasion start to stink. This is not a problem for machine washable clothing as they can be easily washed, even though this may not be necessary as they don't actually look dirty. Again what is more irritating is when clothing is sent for dry cleaning when it does not look unclean but smells stale. The same applies to curtains and to such things as sofas, chairs and mattresses etc. *HG odour eliminator for clothes and fabrics* does not just disguise these bad smells, but actually removes the odour molecules from them. With the extremely fine spray from the spray canister, simply spray the textile aerosol and after 20 minutes the smell has vanished. That saves a lot of dry-cleaning costs! *HG odour eliminator for clothes and fabrics* works on the basis of natural plant extracts.

contains a.o.:	
anionic surfactants, non-ionic surfactants	< 5%
perfumes: butylphenyl methylpropional, hexyl cinnamal, benzyl salicylate

Instructions for use:

1. Spray *HG odour eliminator for clothes and fabrics* generously on the material from a distance of ca. 30 cm.
2. After just 15 to 20 minutes your textile is once more fresh and free from smell.
3. In the case of stubborn odours you may need to repeat the process.

Attention: Store in a dry place to prevent rust formation on the can. Rust formation can impair the strength of the can. Should the can start to become rusty, we recommend handing it in to a waste-collection point. Keep in a frost-free area.
