

HG laminate power cleaner ***(HG product 74)***

HG "laminate power cleaner" is a powerful cleaner for the safe and fast removal of stubborn dirt, grease and protective films from all types of laminate.

Directions:

For normal powerful cleaning:

Dissolve one litre in half a bucket (5L) of lukewarm water and apply it with a wrung-out mop or floor cloth, regularly rinsing it in the solution. Do not rinse or mop dry, simply leave the floor to dry on its own.

To remove HG "laminate protective coating gloss finish" (gloss coating) (HG product 70):

Pour the undiluted product into a bucket and apply it using a wrung-out mop or floor cloth. Do not make the floor too wet (See Caution). Leave to penetrate for a few minutes and if required scrub with a scrubbing brush or stiff broom. Wipe up the liquid with a clean and wrung-out mop, regularly rinsing it in clean water. Finally, mop the floor once or twice again with a wrung-out mop and clean water.

Coverage:

± 10-15 m² per litre undiluted, ± 25-50 m² per litre diluted.

Caution:

Never make laminate too wet as that could cause the seams to swell up.
