

## HG gold shine balsam

- Makes gold as good as new
- Also suitable for gold plate

Because gold is soft, it is sensitive to scratches. Scratches break the fall of light on gold in such a way that it shines less or even not at all. With HG "gold shine balsam", you can remove the scratches and your gold will shine like never before. Also for use on gold-plated objects.

### Directions for use:

Shake can well before use. Pour a small amount of HG "gold shine balsam" on to a clean, soft duster and use this to lightly rub the golden object. With a clean cloth, wipe off the HG "gold shine balsam" until it shines. Always use a clean piece of cloth.

**Attention: Transport and store the box upright. P101-** If medical advice is needed, have product container or label at hand. **P102-** Keep out of reach of children. Always first test gilded items in an inconspicuous place. For regular cleaning of your gold and gold-plated objects, we recommend the HG "gold and jewellery shine cloth". Keep in frost-free area. • Medical personnel can request the data sheet via +31 (0)36 54 94 777 • The consumer's information sheet can be obtained via [www.HG.eu](http://www.HG.eu)
