HG hand cleansing gel

- dermatologically tested
- super powerful
- works safely and quickly
- with a fresh fragrance

HG hand cleansing gel is a unique and very powerful hand cleaning gel with a pleasant fresh fragrance. It removes oil, grease, ink, soil and general dirt safely, quickly and easily, without being harmful to your skin. This product is economical to use thanks to its great cleaning power and the user friendly handy pump.

Not to be used for children under 3 years of age.

Instructions for use: Unlock the dosage pump by twisting it a quarter of a turn to the right. Now press the dosage pump once or twice and rub in the *HG hand cleansing gel* in a normal hand washing movement. The gel warms to body temperature and quickly softens to penetrate deep into the pores. The hand washing movement loosens and removes the dirt. Now rinse off thoroughly with clean water and dry the hands. Lock the dosage pump by turning it a quarter turn to the left, if required.
