drain and plug unblocker

unblocks within 30 minutes

1000 ml e

HG drain and plug unblocker

- unblocks within 30 minutes
- no hot water needed
- for all types of drains*
- ready to use

HG drain and plug unblocker is a unique, safe, but extremely powerful unblocker that offers many advantages. It does not have to be diluted, thus reducing the chance of splashing. *HG drain and plug unblocker* does not foam or splash when poured into the drain. Unlike other granular unblocking agents, it cannot make the blockage worse and does not harm plastic drain pipes.

Directions for use: Carefully pour 500 ml of *HG drain and plug unblocker* into the blocked drain. Leave to penetrate for about 30 minutes and then rinse vigorously with water. Where there is a stubborn blockage that prevents the drain from running, fill the sink with warm water. Add 500 ml of *HG drain and plug unblocker* and leave to stand overnight. Rinse with warm water in the morning. *HG drain and plug unblocker* is heavier than water so it will sink through the water to the blockage. The combination of the unblocker and the pressure of the water will remove the stubborn blockage.

For extremely stubborn blockages caused by food remnants and grease we recommend to use *HG kitchen drain and plug unblocker*.

contains a.o.:

anionic surfactants

< 5%

preservation agents: 2-bromo-2-nitropropane-1,3-diol
