HG insect remover

Insect remnants caked onto your bonnet, bumper and windscreen are not or are only barely removed by normal washing or in the car wash. Extra hard rubbing with a sponge or brush will result in the car paint being damaged. This problem is solved quickly and effectively with HG "insect remover". This unique product softens the caked-on, dried-out insects, which makes them very easy to remove. Safe for all of your car's bodywork. Also suitable for motorcycles/mopeds and helmets.

Directions for use:

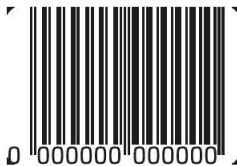

- 1) Turn the nozzle on the front side a quarter.
- 2) Thoroughly spray the insects;
- 3) Leave HG "insect remover" to penetrate for a few minutes;
- 4) Wash the car in the usual way.
- 5) Turn the nozzle a quarter after use (OFF).

Attention: Transport and store the bottle upright. Do not use in direct sunlight. **P101-** If medical advice is needed, have product container or label at hand. **P102-** Keep out of reach of children.

Medical personnel can request the data sheet via +31 (0)36 54 94 777
