### HG 4 in 1 for leather

HG "4 in 1 for leather" is a modern water-based care and maintenance agent for full-aniline and coloured leather (furniture, suitcases, handbags etc.). It is not however suitable for suede or nubuck leather. HG "4 in 1 for leather" nourishes leather, keeping it soft and supple, and prevents drying out due to the sun or other sources of heat. HG "4 in 1 for leather" leaves a thin, non-slippery and non-sticky molecular layer behind which is perspiration resistant and permits the easy removal of dirt (including ballpoint ink) and also beautifies the surfaces.

**Directions for use:** Please read the instructions carefully before using. First clean grubby leather and leather previously treated with other products well with HG "deep cleaner for leather". Allow cleaned surfaces to dry thoroughly (approx. 30 minutes). Shake the bottle well before use! Dampen a sponge or clean, soft, lint-free cloth with HG "4 in 1 for leather" and gently rub in. Remove excess material immediately, especially with full-aniline leather so that no marks from any over application are left. After approx. 10 minutes buff gently with a soft cloth. HG "4 in 1 for leather" ensures that dirt cannot attach itself and prevent the leather from drying out. It is then important to regularly treat both old and new leather

(every 2 to 3 months, depending on the type of leather, use, environmental influences etc.). In the meantime the leather can be best cleaned with a dry or slightly damp, lint-free cloth.

**Attention: Transport and store the bottle upright.** Not suitable for 'open' leather, such as suede and nubuck, bycast or PU leather, or leather where the top layer is entirely worn. If in doubt test an inconspicuous area beforehand: do not use if the area treated remains a dark colour after drying (approx. 30 minutes). Keep in frostfree area. • Medical personnel can request the data sheet via +31 (0)36 54 94 777 • The consumer's information sheet can be obtained via [www.HG.eu](http://www.HG.eu)

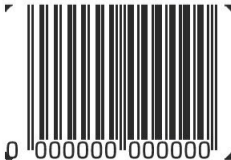

QUESTIONS ABOUT  
CLEANING AND MAINTENANCE?
