barbecue cleaner

extremely powerful

500 ml e

HG barbecue cleaner

- extremely powerful

Removes caked-on and burnt-in grease from all barbecues including gas.

Directions for use:

Push in the nozzle on the front and turn a quarter turn. If you have used the bottle before, remnants of the liquid may be left in the nozzle, causing it to work less well when you reuse the bottle. Before reusing the bottle, we recommend you rinse the nozzle with hot tap water by running the water through the air holes at the side of the foam pipe. Spray *HG barbecue cleaner* onto the surface that requires cleaning. Leave the product to work for 3-5 minutes. If necessary, scrub with a brush or a sponge. Then rinse the treated parts with warm water until they are clean Repeat the treatment several times on extremely dirty barbecue grills. Turn the nozzle a quarter turn after use (blocked position).

Contains a.o.:

anionic surfactants, non-ionic surfactants, phosphonates	< 5%

Attention:

Transport and store the bottle upright. Do not use on untreated aluminium or on the outside of the barbecue. Wear suitable gloves. Consult the instructions for your barbecue first. Prevent any liquid from running out. Should this happen clean it immediately with plenty of water. A temperature that exceeds $\pm 30^{\circ}\text{C}$ in combination with *HG barbecue cleaner* may affect the surface.
