HG grout cleaner ready-to-use

HG "grout cleaner ready-to-use" is a powerful and 'buffered' cleaning agent. These properties ensure that it retains the same powerful effect during soaking and brushing, which produces a fantastic result. This product can be used on nearly all types of grout between wall tiles, floor tiles and brick.

Directions for use:

Remove the locking clip before use. Press the nozzle at the front side and turn a quarter. Spray the grout properly, leave the product to work for a few minutes and then brush the grout with a brush. Finally wipe off the loose dirt with clean lukewarm water and leave to dry. Repeat the treatment if necessary. Turn the nozzle a quarter backwards after use (blocking position). Grout in shower cubicles and bathrooms is often dirty because of scale. In that case you should use HG "scale away". For black deposits on grout (mould), please use HG "mould spray".

Attention: Transport and store the bottle upright. Not suitable for grout treated with gloss paint. Not suitable for grout between calciferous tiles (marble etc.). Use HG "natural stone bathroom cleaner" for those. Silicon joints will not always produce an optimum result. • Medical personnel can request the data sheet via +31 (0)36 54 94 777 • The consumer's information sheet can be obtained via www.HG.eu

Biodegradable according to regulation 648/2004/EC
