

HG®

kitchen

oven, grill & barbecue cleaner

500 ml e

HG oven, grill & barbecue cleaner

Lifts off dried and baked on grease from barbecues, grills and ovens.

Directions for use: Press the nozzle at the front side and turn a quarter. If you have used the bottle before, remnants of the liquid may be left in the nozzle, causing it to work less well when you reuse the bottle. Before reusing the bottle, we recommend you rinse the nozzle with hot tap water, e.g. by running the water through the air holes at the side of the foam pipe. Spray HG "oven, grill & barbecue cleaner" on the surface to be cleaned. If you treat stainless-steel parts, treat them as a whole to prevent colour differences. Leave for 3-5 minutes to work before wiping off with a damp sponge. After wiping away all of the grease, rinse several times with hot water. Repeat the application 2 or 3 times on heavily marked barbecue grills and hot plates. Turn the nozzle a quarter backwards after use (blocking position). For the best results, warm up the oven until the bottom is lukewarm. Before use check the surface temperature of the appliance which should not exceed 30°C. Thereafter use on appliance surface as directed.

Attention: Transport and store the bottle upright. Do not use on untreated aluminium or on the outside of the oven, grill or barbecue. Consult your instruction manual before use. Also avoid the liquid seeping down on to worktops and other surfaces. For (combi-) microwave ovens use HG "grease away". Use of HG "oven, grill and barbecue cleaner" in combination with a high temperature could cause damage to the surface of the appliance.
